CAREER OBJECTIVE

Motivated Software Engineer and BCA final year student with hands-on expertise in Full-Stack Web Development, Artificial Intelligence, and Software Engineering principles. Proven technical proficiency across Python, Java, JavaScript, and modern frameworks to engineer responsive, real-world web applications and scalable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, C++

Web Frameworks & Libraries: React, Node.js, Django, Bootstrap, Tailwind CSS, HTML5, CSS3

Databases: MySQL, SQL, MongoDB

Developer Tools & Platforms: Git, GitHub, VS Code, Linux

Core Concepts: Object-Oriented Programming (OOP), Database Management Systems (DBMS), REST APIs, Computer Networks, Data Structures & Algorithms (DSA)

PROFESSIONAL EXPERIENCE

MERN Stack Intern

Aug 2025 – Mar 2026

Brainy Beam InfoTech Pvt. Ltd.

- Engineered full-stack web applications utilizing MongoDB, Express.js, React, and Node.js (MERN) architecture.
- Designed modular frontend components and integrated secure RESTful APIs to manage server-side application logic.
- Streamlined application structure workflows to optimize client-server communication and interface response times.

Cybersecurity Intern

Dec 2025 – Feb 2026

Patel Web Solution

- Conducted comprehensive network vulnerability assessments using Nmap scanning and network monitoring tools.
- Leveraged Linux terminal operations and shell commands to configure secure system environments and audit access controls.
- Analyzed information security fundamentals to identify potential threat vectors and protect software infrastructure.

Technology Intern (5G & Networking)

Dec 2025 – Feb 2026

ITI Kuber Nagar

- Studied core networking architectures, routing protocols, and high-speed communication systems.
- Documented networking infrastructure fundamentals to align system deployments with modern 5G operational standards.
- Evaluated data security basics across hardware and software access points to guarantee uninterrupted packet transmissions.

TECHNICAL PROJECTS

Scholar AI – AI-Powered Mathematics Platform (In Progress)

- Developing an educational web platform designed to solve mathematical equations and deliver clear, step-by-step student learning paths.
- Implementing logic to process math questions into executable Python tasks to minimize standard AI arithmetic calculation errors.
- Designing user dashboards to format raw data outputs into clean, readable mathematical symbols and responsive UI layouts.

Garage Management System

- Developed a workflow automation system to manage customer records and vehicle service historical data.
- Designed an optimized relational database schema utilizing SQL queries to track technician tasks and update job orders.
- Reduced manual entry errors by creating clean forms for seamless service updates and transactional workflow paths.

Khanipini – Online Food Store

- Built an interactive e-commerce platform featuring dual-role interfaces for food vendors and end consumers.
- Programmed secure backend features allowing shop owners to upload products, update inventories, and receive live customer orders.
- Styled fully responsive interface components using Tailwind CSS and modern styling paradigms to boost user engagement.

Portfolio Website

- Designed and deployed a highly responsive portfolio website optimized for showcasing a video editor's creative portfolio.
- Streamlined rich media content and video assets through asynchronous asset loading techniques to minimize bounce rates and maximize performance.

EDUCATION

Bachelor of Computer Applications (BCA)

Expected Graduation: 2026

Gujarat University

Higher Secondary Certificate (HSC)

Year of Passing: 2023

GSHSEB Board

Secondary School Certificate (SSC)

Year of Passing: 2021

GSHSEB Board

CERTIFICATIONS

- Python with Django Framework Certification
- Ethical Hacking Fundamentals Certification
- 5G Technology & Networking – Accredited by Nokia

LANGUAGES

- English (Professional), Hindi (Fluent), Gujarati (Native)
